

AI for Bharat Hackathon

Powered by **aws**

Team Name : Vanguard3

Team Leader Name : Prathamesh Nikam

Problem Statement : 80 crore Indians miss ₹1.5 lakh crore in entitled welfare benefits annually due to language barriers, digital illiteracy, and complex government portals.

Project: JanSeva AI - "*Seva Har Samasya Ki*"

JanSeva AI is a voice-first, multilingual AI assistant that transforms how Indian citizens access government welfare schemes.

Core Concept:

- Citizens speak in their native language about their needs
- AI asks simple questions to understand their situation
- System matches them with eligible schemes across 3,000+ programs
- Generates pre-filled application forms through conversation
- Provides document checklist and nearest service center location

Key Innovation: Instead of citizens navigating complex government portals, JanSeva AI brings schemes to citizens through natural voice conversation in 10+ Indian languages.

Target Users:

- 150M+ Rural Farmers
- 200M+ Women & Mothers
- 100M+ Students
- 140M+ Senior Citizens
- 80M+ Daily Wage Workers

How Different from Existing Solutions?

Existing Solutions:

Government portals: English-only, complex navigation, require digital literacy
Chatbots: Text-based, single language, no form generation
CSC operators: Limited availability, long queues, manual process

JanSeva AI Difference:

- **Voice-First:** No typing required, works for illiterate users
- **Conversational Form Filling:** AI fills forms through natural dialogue
- **Multi-Scheme Matching:** Single conversation → Multiple scheme recommendations
- **10+ Indian Languages:** Hindi, Tamil, Telugu, Bengali, Marathi, Gujarati, Kannada, Malayalam, Punjabi, Odia
- **Low-Bandwidth Optimized:** Works on 2G networks
- **End-to-End Solution:** From discovery to form generation to submission guidance

Unique Selling Propositions (USP)

- **Voice-First Form Generation:** Industry-first conversational form filling for government schemes
- **Intelligent Eligibility Engine:** RAG-based matching across 3,000+ schemes with 95%+ accuracy
- **Multilingual AI:** Native support for 10+ Indian languages, not just translation
- **Privacy-First:** No data storage, Aadhaar used only for verification, UIDAI compliant
- **Offline Capability:** Caches last 10 schemes for offline viewing
- **Location-Aware:** Finds nearest CSC with office hours and directions

How It Solves the Problem

Problem 1: Language Barrier

Solution: Voice interaction in 10+ Indian languages with natural conversation

Problem 2: Digital Illiteracy

Solution: Voice-first interface, no complex navigation required

Problem 3: Awareness Gap

Solution: AI proactively discovers eligible schemes through simple questions

Problem 4: Complex Forms

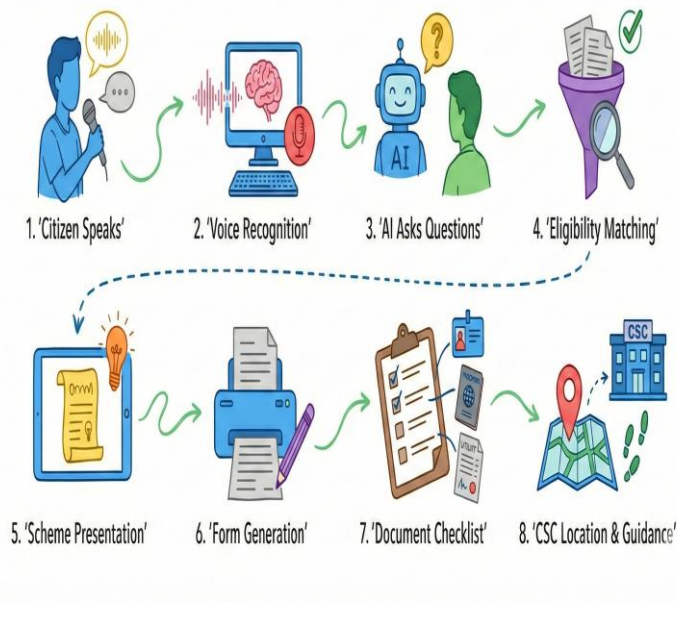

Solution: Conversational form filling - AI asks questions, generates pre-filled PDF

Problem 5: Documentation Confusion

Solution: Clear document checklist with guidance on obtaining missing documents

Core Features

Janseva AI

Voice Processing

- Speech-to-text in 10+ Indian languages
- Text-to-speech with natural Indian voices
- Automatic language detection and switching
- 2G network optimization

Intelligent Scheme Discovery

- Contextual questioning about demographics and needs
- Eligibility checking across 3,000+ schemes
- Ranked recommendations by benefit amount
- Related scheme suggestions

Conversational Form Generation

- Natural language questions instead of form fields
- Real-time data validation
- Pre-filled PDF generation with Indian language support
- Unique reference number for tracking

Location-Aware Guidance

- Nearest Common Service Center (CSC) finder
- Office hours and contact information
- Document requirement checklist
- Travel time estimation

Privacy & Security

- No personal data storage
- Aadhaar masking (only last 4 digits shown)
- AES-256 encryption at rest
- TLS 1.3 encryption in transit
- UIDAI compliant

Session Management

- Resume incomplete applications
- 7-day progress retention
- Multiple application tracking
- Confirmation of previous information

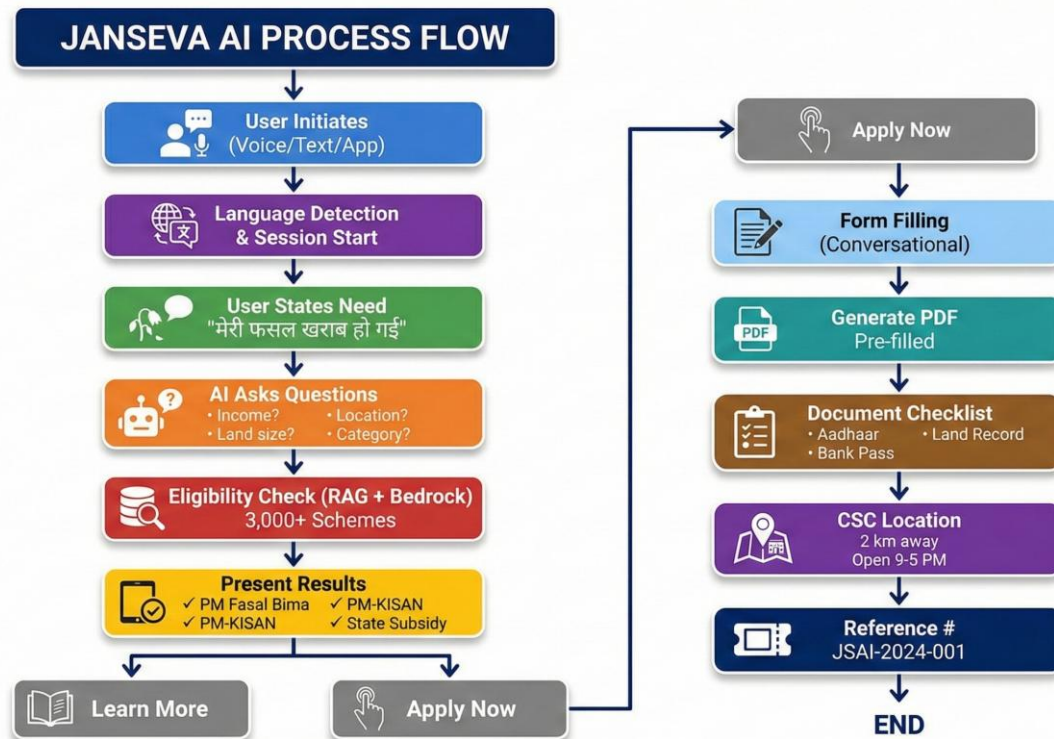

Error Handling

- Graceful fallback to text mode
- Alternative contact for human assistance
- Clear error messages in user's language
- Automatic retry with exponential backoff

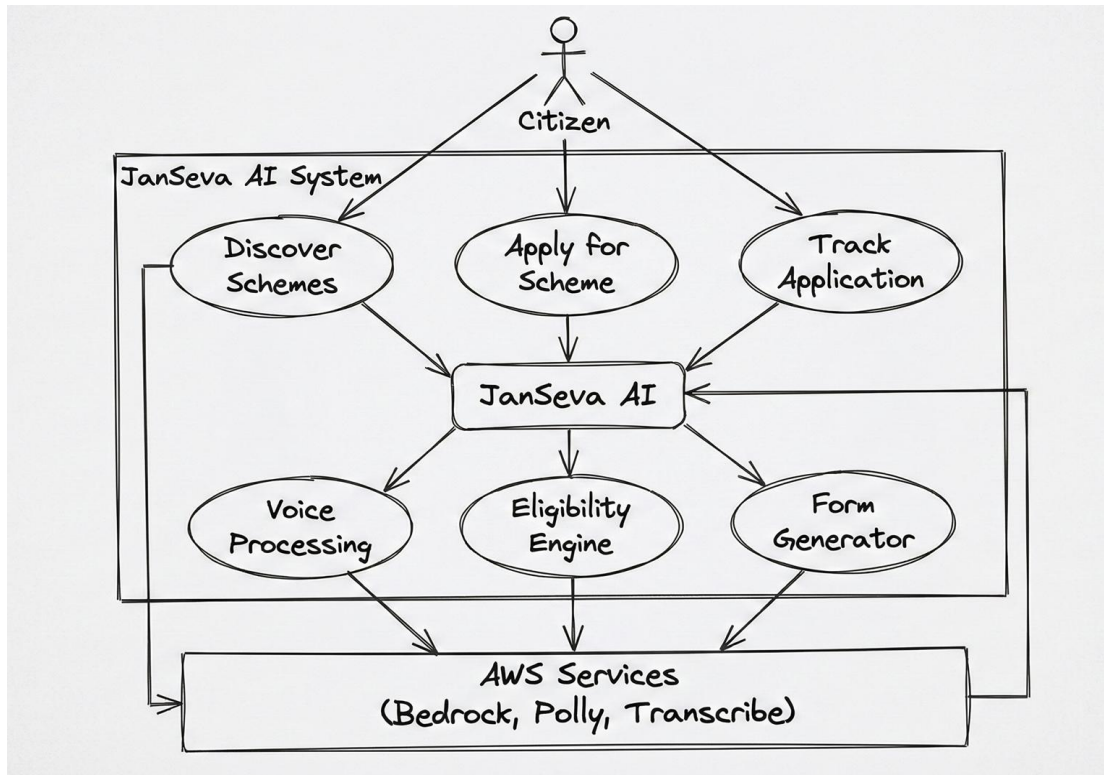

Analytics & Impact

- Anonymized usage tracking
- Scheme completion rates
- User satisfaction measurement
- Benefits unlocked reporting
